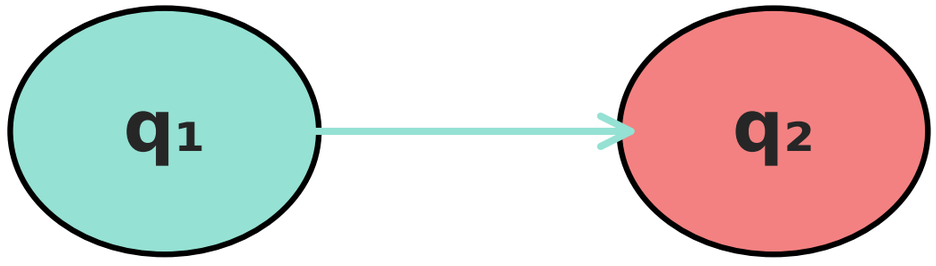
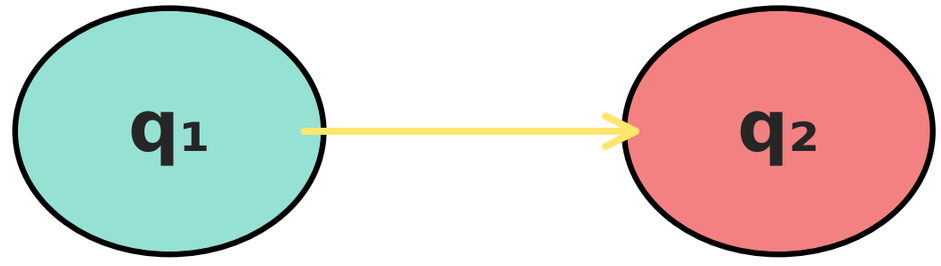
ε-Transition
(Pure Logic)



Logical state change
No environment action needed

$q_1 \rightarrow_{\varepsilon} q_2$

Forward Chain
(Progress)



Necessary steps
Satisfying key propositions

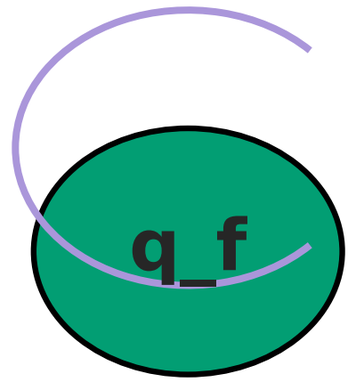
$q_1 \rightarrow_{p} q_2$

Skip Edge
(Shortcut)

Bypass intermediates
Efficient planning

$q_1 \rightarrow_{skip} q_3$

Backward Loop
(Acceptance)



Maintain acceptance
Stable safety

$q_f \circlearrowright$
